Spectro Construction, Inc.
4921 Old Winter Garden Road
Orlando, FL 32861

Attn: The Architect, General Contractor & Specifier

Re: Letter of Recommendation

Gentlemen:

We certify that AmStar Stucco Cement, when shipped, complies with the material requirement of **ASTM C 926, Standard Specification for Application of Portland Cement-Based Plaster**. AmStar Stucco Cement is guaranteed to meet current Specification **ASTM C 1328, Standard Specification for Plastic (Stucco) Cement** for Type M & S.

We recommend that contractors utilizing our AmStar Stucco Cement should follow the mixing, application & curing requirements of **ASTM C 926- Standard Specification for the Application of Portland Cement-Based Plaster**.

It has been my pleasure to occasionally visit Spectro Construction job-sites and observe the proper procedures during application of our stucco on several high quality commercial stucco projects in the past 15 years in Central Florida. Jim Montgomery, Project Manager has always admirably performed with dedication and professionalism that makes for a very pleasant visit to the construction site trailer of the General Contractor. Please don't hesitate to contact me further in this regard.

American Cement Company is the newest manufacturer of Portland cement in the state of Florida. We produce the highest quality Portland cement and Portland cement-based products such as AmStar Stucco Cement at our modern, state of the art facility in Sumterville, Florida. We encourage your technical questions and will provide a guided tour of our plant at your convenience.

Sincerely,

Steven G. French
